TEST PLAN

(Project: OrangeHRM Website Testing)

Project Name: OrangeHRM Web Application Testing
Application URL: https://opensource-demo.orangehrmlive.com
Testing Type: Manual Testing
Tester: Areesha Soomro
Testing Date: March 2026

1. Objective

The objective of this testing is to verify the functionality and usability of the OrangeHRM web application. The testing focuses on validating core modules such as Login and PIM (Personnel Information Management) to ensure that the system behaves as expected.

2. Scope of Testing

Modules Tested

- Login Module
- PIM (Employee Management)

Testing Types Performed

- Functional Testing
- UI Validation
- Input Validation

Modules Not Covered

Due to time limitations, other modules such as Admin, Leave, and Recruitment were not tested.

3. Test Environment

Item	Details
Application	OrangeHRM Demo
Browser	Google Chrome
Operating System	Windows
Testing Type	Manual Testing

5. Test Deliverables

The following documents were prepared during the testing process:

- Test Plan
- Test Cases
- Test Execution Report
- Screenshots of test execution
- Bug Reports (if any)

6. Entry Criteria

Testing will start when:

- The OrangeHRM demo application is accessible
- Test environment is ready
- Test cases are prepared

7. Exit Criteria

Testing will be considered complete when:

- All planned test cases are executed
- Bugs (if found) are documented
- Test execution report is prepared

TEST EXECUTION SUMMARY

Project: OrangeHRM Website Testing
Tester: Areesha Soomro
Testing Type: Manual Testing
Modules Tested: Login Module, PIM Module

Test Execution Results

Total Test Cases	Passed	Failed
7	7	0

Test Case Execution Details

The following modules were tested:

Login Module

The login functionality was tested using valid credentials, invalid credentials, and empty fields. The system successfully validated user inputs and displayed appropriate messages.

PIM Module

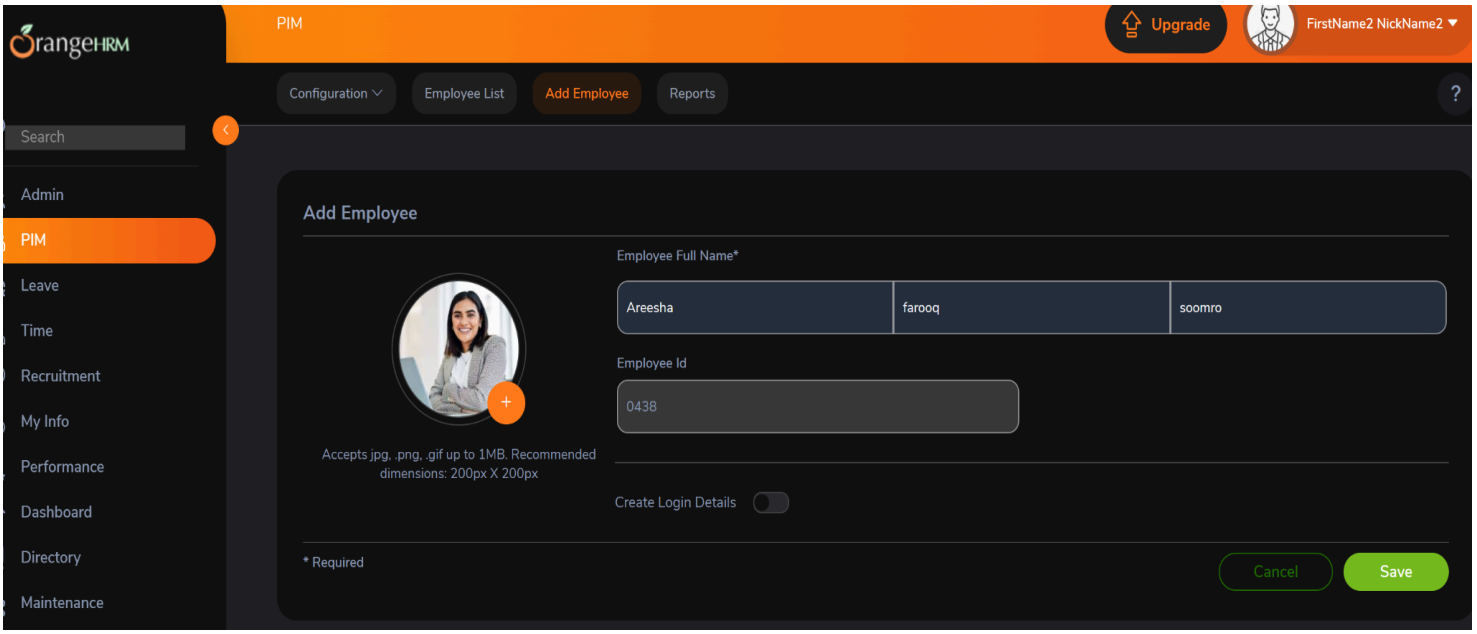
The Personnel Information Management module was tested for employee creation, employee search, and profile photo upload functionality. The system allowed successful employee record creation and search functionality.

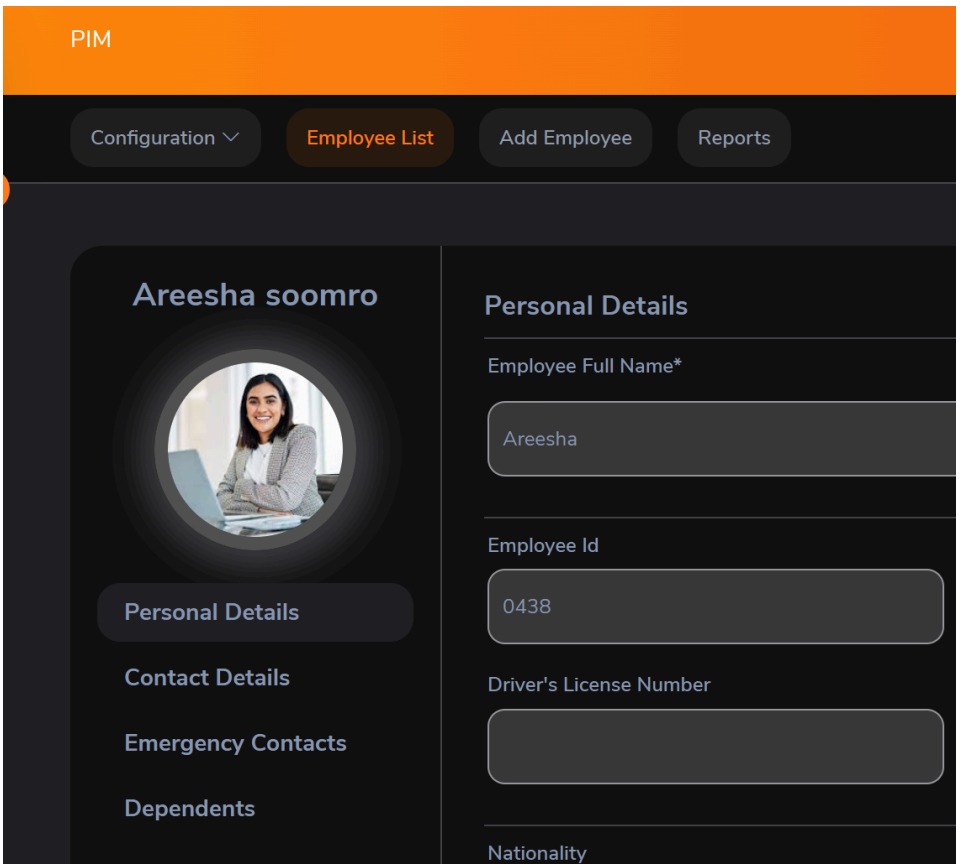
Defects Found

During testing, no major defects were observed. All executed test cases passed successfully.

Screenshots

Screenshots of test execution have been captured and attached to demonstrate successful validation of the system functionalities.





Employee Information

Employee Name: Areesha

Employee Id:

Employment Status: -- Select --

Include: Current Employees Only

Supervisor Name: Type for hints...

Job Title: -- Select --

Sub Unit: -- Select --
